

To Honorary Judge(s)

We are a common family trying to generate some extra income by taking risk as banks do not pay any interest,
We deposited several Crypto currencies into Celcius Network because they were advertising heavily and saying
they are different. They care for the small investors. They took our crypto coins and currencies and loaned out
to people without proper collaterals against it.

Now we lost everything, we needed to pay our daughters student loan, parents medical bills with the earnings
from crypto but all is locked up in Celcius. We do not need \$ amount, we need our Cryptos back.
